Summary

Full-Stack Developer experienced in building real-time web applications, AI-powered tools, and interactive 3D experiences using React, TypeScript, FastAPI, and Python. Passionate about crafting intuitive user experiences and visually engaging digital products.

Skills

Frontend Development	React.js, HTML5, CSS3, JavaScript, Typescript, Threajs, React Three Fiber, Tailwind CSS
Backend & Databases	Node.js, Express.js, Python, Firebase, SQLite, REST APIs
Tools & Platforms	Git, GitHub, Vercel, Render
Additional	Flutter, Dart, Kotlin, Java, C, Version Control

Experience

AU Ignite Future Skills Academy Full-Stack Development Intern	May 2025 – Jul 2025
- Developed and deployed responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). - Implemented secure REST APIs and integrated JWT authentication with MongoDB Atlas for dynamic data storage. - Enhanced UI/UX with reusable React components and Tailwind CSS for modern, mobile-friendly interfaces.	
LaunchED Global Android & Flutter Development Intern	Feb 2025 – Mar 2025
- Built and deployed mobile applications using Flutter (Dart) and Jetpack Compose (Kotlin) with smooth, responsive UI. - Integrated Firebase Authentication and Firestore for secure login and real-time synchronization. - Developed a small-scale React Native + Firebase project, strengthening full-stack and cross-platform experience.	

Projects

Terra Live — Real-Time Disaster Monitoring Platform React, TypeScript, FastAPI, SQLite, React Leaflet	GitHub
- Architected a full-stack disaster monitoring platform integrating real-time hazard feeds from USGS, NASA FIRMS, and GDACS into a unified geospatial dashboard. - Developed asynchronous FastAPI ingestion pipelines and SQLite caching services to deliver low-latency disaster intelligence and interactive map visualizations.	
Solaris — 3D Interactive Solar System Explorer React, Three.js, React Three Fiber, GLSL, Zustand	GitHub
- Engineered a cinematic 3D solar system simulation with real-time orbital mechanics, interactive navigation, and educational telemetry systems. - Implemented custom GLSL shaders, procedural asset generation, and post-processing effects to create a high-performance WebGL experience.	
WebLens — AI-Powered Visual Search Extension React, FastAPI, Python, Chrome Extension APIs, Gemini Vision	GitHub
- Developed a browser extension enabling region-based image capture and AI-powered visual search within web pages. - Built a FastAPI-powered image analysis pipeline integrating Gemini Vision, Google Lens, and Google Search APIs to generate contextual insights and discovery results.	

Education

Poornima University Bachelor of Computer Application	Aug 2023 – Present
Khelgaon Public School Senior Secondary (12th Grade)	Aug 2022 – Mar 2023

Certifications

- Mentorship Program on App Development** (LaunchED Global) – Feb 2025
- Data Mining** (NPTEL, IIT) – Jan 2024 – Mar 2024
- Innovation, Business Models and Entrepreneurship** (NPTEL, IIT) – Oct 2024 – Dec 2024
- Employment Communication: A Lab-based Course** (NPTEL, IIT) – Jan 2025 – Mar 2025
